

# one song one forest

**One Song One Forest** is a unique initiative led by **Mangroove Music** in collaboration with the **Prince Albert II of Monaco Foundation** for the protection of the world's forests. Joining forces with the world of music allows us to raise awareness among the greatest number of people by proposing **new stories** and to act by qualifying and financing programs. The **One Song One Forest** program combines music and forest protection.

This program is part of **3 priority areas of action**:

- Limiting the effects of climate change and promoting renewable energies ;
- Preserve biodiversity ;
- Manage resources and combat desertification.

Mangroove Music and the Prince Albert II of Monaco Foundation are jointly developing **9 field projects** supported throughout the world **over 3 years**.

Mangroove Music meets once a year with the Prince Albert II of Monaco Foundation in order to **select projects** that have been validated by the foundation's scientific committee and that can be the object of an **artistic sponsorship**. All proceeds are invested in the supported field project.

# THE MANGROVES IN WEST AFRICA

Field operators: Éclosio  
Artists: Oumou Sangaré & Youssoupha

Within the framework of the project "**Sustainable management of mangroves from Senegal to Benin**", coordinated by IUCN and financed by the European Union and UEMOA, the Collective **5 Deltas** deploys its intervention on the **mangroves of Southern Senegal** (Casamance),

Guinea Bissau & Guinea. The action consists in **strengthening the capacities of local actors**, by seeking a good **articulation** between local governance, **valorization** of mangrove products and **conservation of ecosystems**.

The overall objective of the project is to achieve integrated **protection of the diversity and fragile ecosystems** of Mangroves in West Africa and their **enhanced resilience to climate change**. The specific objective of the project is to strengthen the management of **protected areas and unprotected mangrove sites**.

The aim is to **link** governance and production systems with mangrove conservation structures at the territorial level.

The collaboration between the Prince Albert II of Monaco Foundation and Mangroove Music aims to strengthen and complete this action by mobilizing additional resources for the benefit of local populations living in the mangroves.
